The Theory of Algorithms, n.p., n.d., chap. 6, p. 202-223. Previous results (60-18688) make it possible to establish the unsolvability of a series of mathematical problems en masse. All these problems are treated as problems on the determination of normal algorithms which permit certain properties of the objects studied to be decided. A series of problems of this kind concerns the theory of associative calculi, i.e., the constructive theory of so-called associative systems.
